Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: Claim 1, line 2, "the base" should be -- the base plate --.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki (6,558,208 B2) in view of Nabeshima (5,519,170).

Suzuki discloses a terminal fitting comprising a base and two fastening pieces 12 extending from a side edge of the base. The fastening pieces 12 have a contact surface 15 for contacting an insulation portion of a wire 50 and at least one protecting portion 18 disposed an intermediate portion on the fastening pieces 12 and at a corner of the contact surface 15. The insulation portion of the wire 50 is aligned at an acute angle to the contact surface 15 of the fastening pieces 12 for avoiding biting contact with the insulation portion of the wire 50 (see Fig. 6). However, Suzuki does not disclose the terminal fitting having a tubular seal and the fastening pieces being crimped at least partly around the outer circumferential surface of the seal.

Art Unit: 2839

Nabeshima discloses a terminal fitting comprising a base, two fastening pieces 8 extending from a side edge of the base and a tubular seal 3 wherein the fastening pieces 8 are crimped around the outer circumferential surface of the seal 3 to securely fasten the seal 3 to a wire 1. Also, the seal 3 provides sealing for a connector where terminal fitting is disposed.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to the terminal fitting taught by Suzuki such that it would have a tubular seal as taught by Nabeshima to provide sealing for a connector.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 5,356,312 by Abe et al discloses a terminal fitting having a seal.
